

SmartSociety User Guide

Role-based instructions for daily society operations

Getting started

- 1. Open the landing page and select Login.
- 2. Visitors can use Visitor Registration when enabled by the administrator.
- 3. Sign in with the account created for your role.
- 4. Use the sidebar to access permitted screens and the notifications icon for updates.

Access and roles

- SmartSociety has five operating roles: Administrator, Resident, Visitor, Security Guard and Maintenance Staff.
- Your dashboard is the starting point for the workflows available to your role.
- Keep passwords private and sign out when using a shared device.

Administrator Guide

Manage the society

- Dashboard: review current resident, visitor and complaint activity.
- Residents and Flats: maintain people, occupancy and linked flat records.
- Staff & Guards: create, edit, activate and manage operational accounts.
- Audit Logs and Society Map: review activity records and society layout.

Run operations

- Complaints: review, assign and track complaints through completion.
- Maintenance Bills and Facilities: manage billing records and facility bookings.
- Notices and Polls: publish announcements and community polls.
- Settings: configure platform controls, including visitor registration availability.
- When registration is disabled, visitors see that registration is currently not available.

Resident Guide

Everyday tasks

- Dashboard: review notices, events, visitors and account activity.
- Profile and Settings: keep contact details and preferences current.
- Notifications: review new requests, announcements and activity.

Services and visits

- Visitor Passes and Visitor Requests: create passes and respond to visit requests.
- Complaints: submit, follow and review maintenance complaints.
- Maintenance: review maintenance records and bills.
- Facility Bookings, Events, Notices and Polls: use society services and stay informed.
- Emergency and Guidelines: access important guidance when needed.

Visitor Guide

Create an account

- Select Visitor Registration and enter your name, email, phone number and password.
- If the administrator disables registration, the page displays a clear availability notice.
- Contact the society office or try again later when registration is unavailable.

Request a visit

- Open Request Visit and enter resident or flat details, purpose, date and time.
- Submit the request and wait for resident approval before travelling to the gate.
- Open My Passes to view approved digital gate passes.
- Present the current approved pass to security at entry.
- Use the Visitor Dashboard, Society Map and Profile as needed.

Security Guard Guide

Gate workflows

- Dashboard: review current visitor and security activity.
- Verify Gate Pass: scan or enter pass details and confirm validity before allowing entry.
- Walk-in Visitor: create a visitor record, select the resident and follow the request process.
- Active Visitors: monitor visitors currently inside the society.

Records and alerts

- Entry Logs and Exit Logs: review recorded gate events and refresh when needed.
- All Visitors: search visitor history.
- Overstay Alerts: act on visitors who exceed their permitted stay.
- Profile and Settings: maintain guard account information.

Maintenance Staff Guide

Work complaint lifecycle

- Dashboard: review current workload and assigned complaint summary.
- Assigned Complaints: open the complaint and begin the required work.
- In Progress: update status while repair or maintenance work continues.
- Completed Work: review completed items.
- Complaint History: review prior work for reference.

Good operating practices

- Keep status updates accurate so residents and administrators see the current situation.
- Use only the workflows permitted for your role.
- Contact the administrator for access, account or settings corrections.
- Use Profile and Settings to keep your account and profile picture current.
